---

## SUMMARY

As a developer guided by strong determination and discipline with a proven track record of delivering results. My commitment to honesty and integrity has earned me a reputation as a reliable and trustworthy individual dedicated to continuously growing to reach my full potential and empowering my team.

## SKILLS

Python | JavaScript | HTML | CSS | Node.js | Express.js | Django | React | Mongoose | MongoDB | PostgreSQL | SQL | Git | VS Code | Heroku | jQuery | Typescript | R Studio | Excel VBA | MATLAB | Fluent in Chinese (Cantonese & Mandarin)

## PROJECTS

**Roulette:** A web-based casino game where players can place bets on different outcomes, such as a single number, groupings of numbers, colors, or odd/even numbers. Built using HTML, CSS, and JavaScript.

**YumYum:** A full-stack web application that allows users to browse and search for restaurants by location, cuisine, price range, and more. The app features a responsive and intuitive UI, utilizes the Yelp API, and enables users to leave reviews and save favorite restaurants. Built using JavaScript, CSS, HTML, Node.js, Express, and MongoDB.

**NetMart:** A full-stack e-commerce app for buying and selling used goods with RedCircle API for search results and AWS S3 for image uploads. Users can browse, buy and sell goods, write reviews for sellers after order completion, and add products to their wish list. Built with HTML, CSS, JavaScript, Python, Django, PostgreSQL, and AWS S3

## EXPERIENCE

### Hack For LA, Remote

Mar 2023 - Present

#### Software Engineering

- Provide full-stack support to non-profit organizations serving under-served communities in Los Angeles County
- Contribute to open-source software development projects, utilizing technologies such as JavaScript, Python, React, Express, SQL, PostgreSQL, HTML, and CSS to design and build web applications

### General Assembly, Seattle, WA

Jan 2023 - Apr 2023

#### Software Engineering Fellow

- Built skills with key technologies such as JavaScript, React, Express, SQL, PostgreSQL, HTML, CSS, and Python through 500+ hours of instruction
- Developed, designed and deployed multiple full-stack web applications individually and collaboratively
- Demonstrated exceptional self-motivation and initiative, consistently working independently to learn new technologies and troubleshooting issues as they arose

### Tian Ji Industry & City, Shenzhen, China

July 2021 - Sep 2021
